

Biacore™ 1 series SPR systems

Biacore 1 series — next generation one needle, six flow cell Surface Plasmon Resonance (SPR) platform.

We offer three system configurations that can grow with your group's needs for sample capacity, sensitivity, and throughput.

- Robust, reproducible interaction analysis data from day one with minimal effort and training.
- Novel injection tools that expand application versatility — affinity, kinetics, concentration multi-complex analysis, epitope binning, and many more.
- Predefined methods and interactive runs help minimize time spent on assay development.
- Activity queue increases operational efficiency by stacking methods in an analytical sequence.
- Temperature controlled sample hotel.
- Robust results from difficult samples. Pure or complex. Small or large.
- Affordable cost and reduced running expenses.

Sign up to explore all the features of Biacore 1K, Biacore 1K+, and Biacore 1S+ SPR systems.
